

# Four head welding machine WSA4H

Precise welding for highest demands

# WSA4H

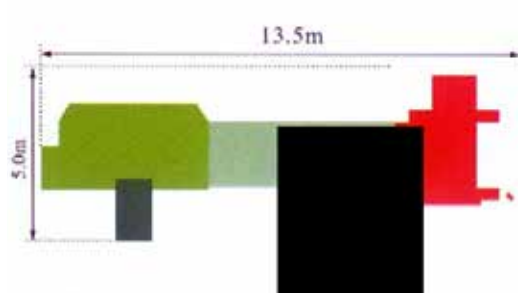

For welding plastic frames or casements with 90° angle welding heads in one operation.

## DESCRIPTION:

- left and right side fixed
- easy-to-use insert position
- heated welding beat limit 0,2 - 2mm
- SPS control
- electronic function contro
- fast change device for welding foil
- automatic outfeed of the working pieces
- pneumatic profile feed

## TECHNICAL DATA:

Voltage:	220/400V, 50/60 Hz
Power:	15kW
max. welding temperature:	300°
Temperature welding bead limit:	65°
min. profile height:	35mm
max. profile height:	120mm
Profile height without line:	unlimited, 180mm
Welding area in line:	450x450mm
Welding area without line:	400x350mm
max. welding area:	2100x2400mm
Air connection:	6-8bar
Weight:	2580kg

Also available as a welding plaster line together with the WPA-CNC

Space requirement welding plaster line

## DETAILS / OPTIONS:
