

Water-slot milling machine WSK8-3

Manual water-slot milling machine with 3 motors

Water-slot milling machine WSK8-3

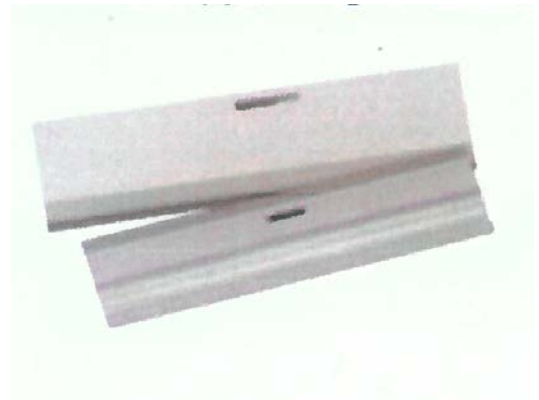

Manual water-slot milling machine with 3 milling motors

DESCRIPTION:

- 3 milling aggregate from vertically from above and below and horizontal from the back for water-slots in the fold down and out
- low-noise, robust three-phase motors
- automatic switch-on when operating the control lever
- the upper milling unit is steplessly swiveling up to 45°
- the units are manually movable according to scales and stops
- pneumatic double-clamping

TECHNICAL DATA:

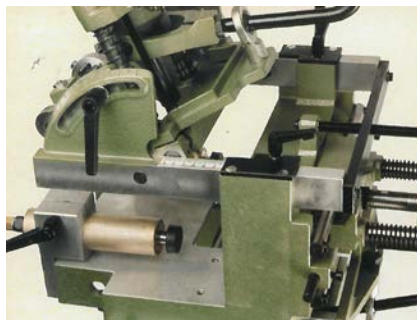

Voltage:	230/380V, 50Hz
Power of each motor:	0,28kW
Working length:	2700mm
Speed milling spindle:	11000R/min
max. profile height:	110mm
Air connection:	6-8bar
Air consumption:	250l/min
Milling area:	110x80x50mm
Weight:	135kg

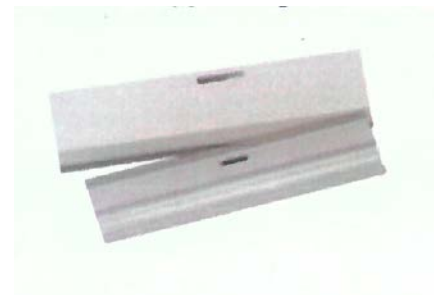

DETAILS / OPTIONS:

Swiveling scale for upper unit, pneumatic tensioning device, resilient miter stop

Precise adjustment via scala

Roller conveyors with support on both sides

ORDER NUMBERS:

21083801 Water-slot milling machine WSK8-3

Optionen

95112091 Roller conveyors double-sided WSRBB

95085081 Profile support

95015491 High performance cutting fluid 5,0l, mixing ratio 1:19

95076921 Cooling sprayer standard
